Timber Frame Outdoor Living Structures

2010 Design Award – 'Other Design'
Category – CASA LUNA

Traditional post and beam joinery by
the artisans at TimberhArt
Woodworks.

beyond the ordinary....

The possibilities are endless...Designed to meet your needs...

Featuring traditional mortise and tenon joinery secured by wooden pegs, these timber frame structures are uniquely crafted by our skilled artisans for easy assembly by the do-it-yourself customer or commercial contractor.

The 6'x6' posts and other timbers are pre-fitted, planed and ready to be finished; all exposed edges are eased.

We offer a variety of wood, shapes, roof styles and sizes:

- Oak, pine, hemlock, eastern and western cedar
- Square, rectangular or octagonal
- Straight, tapered, oriental, octagonal or hipped-gable roofs
- Sizes from 8'x8' to 16'x16'

.....or let us create one for you!

Experience the satisfaction of building a focal point for your landscaping enjoyment.

The Artist Wood Outdoor Living Structures is delivered ready to assemble. Depending on the size and style, assembly time is two to six hours for two to four people.

With our innovative design, minimal tools are necessary for assembly. Included is your main tool, a wooden mallet, for hammering the wooden pegs, known as 'tree nails'.

Optional specialized features included screens, windows, doors, privacy features and trellis work.
